

Broadcast radio runs constant commercials regarding satellite radio's dearth of information, news, weather, etc.
Now I learn that they are desperately trying to lobby the necessary persons who block their (satellite radio's) ability to carry these stations and this type of information.

What gives. I love satellite radio, and especially out here in the boondocks where NOTHING else comes in reliably.

DO NOT take away my radio. And DO permit satellite radio to carry whatever it wishes and the market demands.

This is America, not Russia !! (or even France or Germany !!)
